MODULE 1: DIGITAL LITERACY

LEARNING NOTES

COMP 4 - E LEARNING WITH WEB PAGE

Module Overview

Digital literacy is the ability to use computers, digital devices, the internet, and online tools effectively and safely. It helps learners find information, communicate, study, and complete work-related tasks.

Learning Objectives

After completing this module, learners should be able to:

1. Explain the meaning and importance of digital literacy.
2. Identify basic computer parts and their functions.
3. Understand internet browsing and common digital tools.
4. Apply online safety and password security practices.
5. Use digital technology responsibly in school and at work.

1. What Is Digital Literacy?

Digital literacy means knowing how to use technology to find information, communicate, learn, and complete tasks. It also involves knowing how to stay safe and responsible when using the internet.

2. Basic Computer Skills

- Keyboard: Used to type letters, numbers, and symbols.
- Mouse or Touchpad: Used to point, click, select, and move items.
- Monitor: Displays text, pictures, videos, and other information.
- Printer: Produces printed copies of documents.
- File Management: Organizing, saving, renaming, and finding files on a computer.

INTERNET BROWSING AND DIGITAL TOOLS

3. Internet Browsing

An internet browser is an application used to access websites. Examples include Google Chrome, Microsoft Edge, Mozilla Firefox, and Safari.
A search engine helps users find information online. Google and Bing are examples of search engines.

Tips for Searching Online

- Check the website and author.
- Look at the publication date.
- Compare information from reliable sources.
- Avoid sharing information that has not been verified.

4. Common Digital Tools

- Word Processors

Used to create letters, reports, and other documents.

- Spreadsheet

Used to organize information, perform calculations, and create tables.

- Email

Used to send and receive messages and files.

- Cloud Storage

Used to store and access files online.

- Online Learning Platforms

Used to access lessons, videos, quizzes, assignments, and other learning resources.

Why are these tools important?

Digital tools help students and employees organize information, communicate with others, finish tasks, and access learning materials more easily.

ONLINE SAFETY AND PASSWORD SECURITY

5. Online Safety

Online safety means protecting yourself, your personal information, and your devices when using the internet.

Six Online Safety Practices

1. Protect Personal Information. Do not share passwords or sensitive personal information with untrusted people.
2. Avoid Suspicious Links. Do not click unfamiliar links or download unknown files.
3. Use Trusted Websites. Choose secure websites and trusted applications.
4. Update Your Devices. Keep your software and devices updated.
5. Log Out of Shared Computers. Always log out after using your accounts on a shared device.
6. Check Information. Make sure information is reliable before sharing it online.

6. Password Security

A strong password should be long, unique, and difficult to guess. Avoid simple passwords such as your birthday, name, or “123456.”

How to Protect Your Passwords

- Use a different password for each important account.
- Use a password manager to store passwords securely.
- Enable two-factor authentication when available.
- Never share verification codes with someone who asks for them unexpectedly.

Safety Reminder: Think before you click, protect your information, and be careful when communicating with people online.

WHY DIGITAL LITERACY MATTERS

7. Why Is Digital Literacy Important?

Digital literacy helps learners complete school activities, communicate with others, organize documents, and search for reliable information. It also prepares them for workplace tasks and helps them avoid online risks.
Being digitally literate means using technology effectively, safely, and responsibly.

Key Takeaways

- Learn the basic functions of computer parts.
- Use browsers and search engines properly.
- Choose the right digital tool for each task.
- Protect personal information and passwords.
- Check online information before trusting or sharing it.
- Use technology responsibly at school and at work.

Self-Check

Answer the following questions to review what you have learned.

1. What is digital literacy?
2. What is the difference between an internet browser and a search engine?
3. Give two examples of common digital tools and their uses.
4. Give three ways to stay safe online.
5. What are two characteristics of a strong password?
